LOC Number 42587 is hereby amended as follows:

Item 4.11 is being added to read:

**“Please be advised it is the State’s intention that the hardware and software ship to ITS, Attention Alan Collums, at the Robert E. Lee (REL) facility at 239 North Lamar Street, Jackson, MS 39201. The delivery to the REL facility will need to be coordinated with ITS as staff are not located onsite to accept delivery. The REL facility has no loading dock and will require a truck with a lift gate and must include inside data center delivery with floor protection provided by the Vendor.”**

The following questions were submitted to ITS and are being presented as they were submitted, except to remove any reference to a specific vendor. This information should assist you in formulating your response.

**Question 1:** Since this is a LOC, will MS ITS consider alternative proposals?

**Response:** No.

**Question 2:** Line Item 1 General Overview and Background

In the LOC, references are made to a future grid implementation of the TS7720 at REL, but the LOC does not mention services to implement this grid. Is the State wanting Vendor assistance in this implementation as part of this LOC response? If so, can the State please amend the LOC to provide a space for pricing and a detailed Statement of Work (SOW)?

**Response:** No services are requested at this time. Grid will be implemented at a future date.
